PUBLIC NOTICE

WATER SERVICE LINE (Lead/Copper) UPDATE

Thank you to residents for filling out the online forms, sending pictures, and allowing public works to inspect pipes. Based on the requirement from the EPA and the Minnesota Department of Health we are required to mail notices to all residents regarding our results of our lead/copper findings. The following information does not impact the water quality that you've come to expect from the city. There are lines that will be replaced when funding becomes available.

City of Winthrop has completed and submitted our service line materials inventory to the Minnesota Department of Health. The service line inventory is publicly available, and you can check the materials for your service line by visiting the Lead Inventory Tracking Tool (LITT) at https://maps.umn.edu/LSL/ you may also contact us at 507-647-5306. To complete the service line inventory our system used pictures and physical assessments of pipes in homes. As of 10/16/2024, our inventory contains 0 lead, 2 galvanized requiring replacement, 2 unknown material, and 0 non-lead service lines.
